INTRODUCTION

HISTORY

The Hague Center for Global Governance, Innovation and Emergence (THC) was founded in 2008 by the Center for Human Emergence (CHE) - foundation with ANBI status - with Peter Merry and Anne-Marie Voorhoeve as initiators. The aim was to conduct internationally oriented meshwork projects under this name. In 2013, the board of CHE decided to disconnect THC from the CHE, under the leadership of Anne-Marie Voorhoeve. As a new independent foundation, THC builds on the ideas and years of experience in doing meshwork projects.

THE WORK THC DOES

*We are an organ'isation and co-creative collective
serving the emergence of a conscious, harmonic humanity.*

*We innovate heart-centered planetary governance
with all domains of life, visible and invisible.*

THC exists to help align necessary resources for the current human and planetary transition. This transition is, in its essence, about moving from separation and polarization, towards coherence and complementarity. This same transition is playing itself out across all sectors — ecology, economy, and governance, to name a few key ones.

The Hague Center focuses on international societal challenges whose complexity requires collaboration between multiple stakeholders. We provide insight into the current condition, and co-design and facilitate transition processes towards better futures

The Hague Center operates on a global scale, including a network of centers (Europe, Egypt, South Africa, Mexico and Canada) and partnering with global-scale organizations such as the Club of Budapest, NETSPIRIT, Integral City, WholeWorld-View and Together.

THC serves the global community through large-scale projects and local communities through projects designed to meet local challenges.

The foundation has as its aim:

- To be Co creators from the heart for planetary enlightenment
- To contribute to the co-creation of a global society in which humankind can realize its greatest potential
- To co-create practices for global governance, innovation and emergence in order to weave the fabric of society into one social body
- To be process guides helping national and international institutions solve complex challenges such as how to reach their Sustainable Development Goals, using the power of collaboration and spiritual intelligence.

THC seeks to achieve its purpose by:

- Initiating our own projects (for example: School of Social Alchemy, Conscious Witness Project)
- Accepting commissioned projects
- Establishing strategic connections
- Providing training, conducting coaching and designing such projects
- Arranging speakers for national and international conferences
- Participating in, cooperate with, execute governance/administration
- Providing services to other companies and legal entities, who in any way contribute to our purpose.

All THC projects are interconnected and have multiple dimensions. Together they contribute to the development of 'global governance, innovation and emergence'

PROJECTS 2021

GLOBAL GOVERNANCE

STRATEGIC CONNECTING AND CAPI

Establishing strategic connections, which serve the purpose of THC is an essential part of our work. An important aspect of that is CAPI: Coalescing Authority, Influence and Power (Adizez, Don Beck).

In the different strategic reasons for making connections there are two movements:

- From the inside out - what is needed for our own individual and collective consciousness growth to be available for our work, including participation in Communities of Practice;
- From the outside in - aimed at entering into strategic connections for existing and new policy developments in different sectors, between sectors and at different locations.

THC members often fulfill an initiating, leading, facilitating or actively participating role in different networks and organizations that work towards consciousness development.

THC is involved in a large number of projects, networks and networks of networks, including

- WholeWorld-View
- Evolutionary Leaders Circle
- World Unity Week
- Unity Earth
- SINE network
- Integral City
- Center for Human Emergence
- The Club of Budapest
- Co-Creating Europe
- Hopemakers Network
- NETSPIRIT
- Together/Mabaad
- Peace Day Youth Assembly
- City Transformers
- Humanity Rising
- WeWorldwide
- Care First
- Gaianet
- Loving Classroom

- NOW Assembly
- Global Education Futures
- Purpose Earth
- One Humanity Institute
- UK Spirituality in Education Alliance (SIEUK)
- We the world
- The Scientific and Medical Network (SMN)
- Codes for a Healthy Earth
- MetaalKathedraal
- The Laszlo Institute of New Paradigm Research
- Club van Boedapest Nederland
- Het Veerhuis
- Greenheart

As a result, THC can be a connecting link between these different initiatives, and help them to reinforce, complement and learn from each other, so that what they do is aligned with a shared and overarching goal.

EVOLUTIONARY LEADERS CIRCLE

Anne-Marie Voorhoeve has been active in the [Evolutionary Leaders Circle](#) since 2019, joining other leaders such as Ervin Laszlo, Jude Currivan, Don Beck, Deepak Chopra, and Jean Houston. In 2021 Kara Stonehouse was honored to join as well.

The Evolutionary Leaders Circle is a group of thought leaders from diverse disciplines who come together in synergy to help support a shift in consciousness. The Source of Synergy Foundation shares the work of the members in the circle with the public in the spirit of open inquiry through social media, various educational opportunities and lively exchange.

Anne-Marie is a member of the Evolutionary Leaders Council for the Source of Synergy Foundation, as well as the nominations committee for new Evolutionary Leaders.

She is a member of the Synergy Circles:

- Conscious Business Synergy Circle
- [SDG Thought Leaders Circle](#)
- unitive narrative Synergy Circle (private)
- UNITY & PEACE Synergy Circle

The Source of Synergy Foundation organizes Synergy Circle gatherings as part of its mandate to expand synergy among like-minded people seeking to serve the highest good. A number of Synergy Circles have been birthed by Evolutionary Leaders choosing to come together among areas of common interest or in local communities.

SDI LEADERSHIP AND MESHWORKING

THC's expertise lies, among other things, in the field of Spiral Dynamics integral, and in bringing organizations and people together and motivating them to work for a higher purpose. A unique expertise of THC lies in the design and facilitation of multi-stakeholder projects. The term we use for this is Meshworking, introduced by Dr. Don Beck.

Meshworking is both a vision and a method. In essence, Meshworking is about the way in which we bring a variety of stakeholders together behind a common, higher goal, so that real progress can be made in solving complex issues.

Unlike in a network where the connections between the partners are focused on their own interests, each partner's own interests are placed within the context of the common interest. THC fulfills the role of 'whole holder' - the person who gives the example of how cooperation can be based on social intentions. THCs often fulfill this role on a (partly) voluntary basis. This also ensures a large degree of independence.

MAGIC CANOE, SCHOOL OF SOCIAL ALCHEMY EN 7 LEVELS OF CO-CREATION

The Magic Canoe is a vehicle and co-creative movement that invites and welcomes all of humanity to participate in the integration of polarities into a harmonious united social body rooted in love.

By expressing his or her unique potential, each individual contributes to the co-creation of a healthy, harmonious and very social body.

The image of the Magic Canoe is inspired by a true story from Canada's indigenous people, with a story stewarded by social activist Eric Young..

On board of the Magic Canoe is the 'School of Social Alchemy', which prepares people to participate in the co-creative global movement of the Magic Canoe, and helps them develop the capacities needed to build resilient and integral communities.

The core of the School of Social Alchemy is based on the 7 levels of co-creation: the different levels of complexity and functions that can be found in a large-scale co-creative process. These levels are: personal mastery, interpersonal relationships, natural working groups, organizations, transformative networks, Communities of Practice, social body.

THE CLUB OF BUDAPEST

Anne-Marie Voorhoeve fulfills the position of Chief Creative Director of The Club of Budapest. In this capacity she leads the COB Projects Office, in which Pieter Wackers also works on behalf of THC. In addition, Anne-Marie is director of The Club of Budapest Netherlands.

The [Club of Budapest](#) (COB) is an international think tank and 'action tank', founded by the Hungarian systems philosopher Ervin László, with headquarters in Budapest and 25 national

and regional departments spread over 6 continents.

The mission of The Club of Budapest is to be a catalyst for the transition to a sustainable world, by promoting the emergence of planetary consciousness, connecting generations and cultures, integrating spirituality, science and the arts, and supporting learning communities worldwide.

In 2021, the COB Projects Office organized a celebration of Ervin László's birthday during World Unity Week.

We invited COB directors and other friends to record a birthday message. These messages were edited into a special video that was presented to Ervin during a zoom call with COB members and directors, friends and family, in which we celebrated his life and work..

NEW COB MEMBER CLUBS

In 2017, the COB projects office developed guidelines for the process of starting a new local Club of Budapest Member Club.

Since then, we have had talks with potential Member Clubs in New Zealand, Malta, Poland, Germany and Cyprus.

In Poland, a new Member Club has been installed in 2018.

In Germany, Peter Spiegel was appointed COB ambassador for Economic Affairs. Preparations for a new Member Club in Germany are ongoing.

In 2021 we started the process of setting up a new Member Club in Cyprus. Anne-Marie is planning to visit in 2022.

INTEGRAL CITY

For many years, THC has been closely connected to [Integral City](#), an international meshwork organization founded by Marilyn Hamilton.

Anne-Marie Voorhoeve, Diana Claire Douglas and Pieter Wackers are part of the Integral City core team.

Integral City is a global constellation of communities of practice that nurtures cities as human hives. Launched in 2005, and now in Canada, USA, UK, Netherlands, Spain, Russia, Mexico, Australia and South Africa, Integral City connects the 4 Voices of the city to energize relationships, unify visions and develop eco-regional resilience strategies for hive wellbeing. Through placecaring and placemaking it inspires a Planet of Integral Cities as living, integral, evolutionary human systems, to become Gaia's Reflective Organs.

On several occasions, like for example the Living Cities Forum, Anne-Marie and Pieter have spoken or been on a panel in the context of Living Cities, a group that is closely connected to Integral City and focuses mainly on Russia and the Russian speaking world.

THC contributed two chapters to the graphic book [Urban Hub 20: Accelerating City Change in a VUCA World](#), a volume in Paul van Schaik's Urban Hub series curated by Marilyn Hamilton: *Systemic Constellations for OneCity* by Diana Claire Douglas and *Meshworking for Thriving Cities* by Anne-Marie Voorhoeve and Kara Stonehouse, together with Morel Fourman.

For [Urban Hub 21: Dare to Dream](#), Anne-Marie, Shweta, Kara and Diana Claire wrote the chapter *Evolution's Dream, Humanity's Mission: Meshworking Cities and Eco-regions*.

Pieter is part of Integral City's faculty, and teaches Integral City Beyond Smart, together with Marilyn Hamilton.

Diana Claire was honored as Integral City Meshworker of the year 2018, and Anne-Marie was Meshworker of the year in 2019.

IEC 2021

The [Integral European Conferences](#) are the main global gatherings of the international integral community.

They unpack the full potential of the integral approach, fleshing out the shared vision with new findings, applications, research and experiential processes to accelerate change in the world.

The conference is the biggest Integral Social Mixer of the year and it is designed to be a deeply human event where people talk, dialogue, listen and really meet each other.

At the Integral European Conference 2021, Anne-Marie and Diana Claire co-facilitated a workshop “What is Humanity’s Role in the Future of Collective Evolution?” Humanity is being pushed by Evolution and being pulled by the Emerging Future. In the midst of these strong forces, how does Humanity come into right relationship with the flow of Life and Love?

CO-CREATING EUROPE

Anne-Marie Voorhoeve is part of the core team of [Co-Creating Europe](#).

Co-Creating Europe’s mission is connecting spiritual and social change makers from all European countries and regions - aiming to inspire and learn from each other to transform Europe into a place of solidarity and diversity, rooted in the prior unity of all being.

Co-Creating Europe wants to show the European public that there are many Europeans who don’t want to let their societies fragment into isolated subcultures. In this spirit of human unity they want to initiate a culture of dialogue, and individual and collective growth.

DE-LIGHT-FULL DIALOGUES

De-Light-Full dialogues evolved from the THC initiative of a Circle of Art of Intergenerational Interaction.

Funded by the Anna Lindh Foundation, the first De-Light-Full Dialogue was a gathering of young changemakers from the Euromed region with leaders and co-creators from other generations. Together, we aimed to cultivate meaningful support for the commitments of the

youth towards creating a world that works for all of life.

The dialogue was a first step in prototyping an Intergenerational co-creative space. How can we design the playing field and the rules together, and then play?

What works for each generation, and what can each generation’s unique contribution be? (Without losing sight of the differences within generations)

Through the dialogue, we further developed the principles of keynote listeners.

WEWORLDWIDE

Pieter Wackers is part of the core team of [WeWorldwide](#).

WeWorldwide is a movement with an online platform providing a home for heart intelligence. It opens up the space for people to be supported in who they really are and the contributions each person makes towards creating the world we all wish to live in.

In 2021 Pieter’s main focus has been on developing the Personal Key process. The personal key is how someone’s essence expresses itself. The activity of our heart by which we intelligently respond to our environment and fulfill our life purpose. Something that is very natural to us. It speaks of our true self in a very clear manner. Our personal key describes the unique way by which we contribute to our world community.

It has been fascinating to see people give words to this part of themselves that has always been there, but not always known. It is strongly connected with the essence of who we are. But where our essence is static, the personal key describes the activity of that essence - the dynamics of that essential Self, which we also experience as the unique activity of our heart’s intelligence.

WeWorldwide has developed a process for people to find their Personal Key. As of December 2021 there are 5 Personal Key

facilitators, and we are developing a training to train more.

TEAM DEVELOPMENT

We continue an ongoing internal governance process to define our own heart-centered governance practices. We hosted a virtual team retreat and developed small project teams to define our governance structures. We are transitioning to a more formalized version of our governance practices which we sense will be of value to share with groups aligned with our vision and values.

We used deep listening processes such as Life-Alignment, ADIEWA and Systemic Constellation work. Anne-Marie hosted and Diana Claire facilitated several Systemic Constellations. The themes were;
 “Are we a coherent co-creative collective?
 Individual gifts and place in THC Field?”
 “Partnering with Donut Economics.”
 “Preparing for World Unity Week.”

Continuing to develop THC’s practice of moving beyond polarization, Diana Claire, Anne-Marie, Kara and Mary Elizabeth met to process polarities using Leslie Temple-Thurston and Corelight’s Marriage of Spirit tools.

Lisette Schuitemaker offered three sessions on the Five Child Conclusions based on her book

Jude Currivan offered three sessions on The Story of Gaia, to deepen our knowledge and awareness fwe can bridge the separation between consciousness and science when we embrace unitive awareness. Consciousness cannot only be traced and experienced in our interior and described from (inter)subjective

perspectives, but can also be traced in the exterior and defined in objective perspectives, supported by the study of Astronomy, as Currivan does in her work on the Whole World View. The world is multidimensional, interconnected, interrelated and in-formed. To overcome the world of separation, there is a “fundamentally unified nature of the whole - the me, the we, and the all”

WORLD UNITY WEEK AND PEACE WEEK 2021

The [World Unity Week](#) online convergence of hundreds of peace builders and change agents around the world creates a space for global connection and nourishment. These convergences continue throughout the year at the changing of the seasons with Peace Weekend in September, Enlightening our Way in December and Beloved Community in early Spring.

We are actively offering our Journey of the Magic Canoe to this process, where we can all paddle together to get us to ONE WORLD, where our governance, education, healthcare and businesses are all aligned with the thriving of all people and all life. We have committed to this practice until 2030. The mission is to see a sustainably peaceful world emerging.

We work closely with UNITY EARTH, Purpose Earth and the SINE network and are co-producer of World Unity Week which attracts millions of views on social media and brings together approximately 600 globally diverse co-creators to offer hundreds of free events. As part of the generous space we hold, we raise funds for Purpose Earth to support on the ground initiatives making significant change

for peace, justice and sustainability. The conversations and ideas shared in these convergences are the sparks of the global fire we are tending. We see glimmers of the future we are capable of building together.

Anne-Marie Voorhoeve is a core contributor and strategic connector in this project.

Anne-Maire Voorhoeve was very present in the One World Town Hall where UN level governance discussions took place.

Diana Claire and Analesa Berg co-hosted a week-long program in a zoom room called “Being the New Human.” They brought together several speakers and events each day — each an expression of what it means to be a new human. Diana Claire also facilitated a workshop with Hilary van Welter called “The Imaginarium: designing for change.”

Kara Stonehouse lead a theater troupe, who co-created and performed a musical on zoom with music by Gary Malkin and Danielea Castel. We played out a story of the Magic Canoe using snapchat costumes and immersive views in zoom as the sets.

During Peace week 2021, THC hosted a five day journey called UP and GO! Unity and Peace Governance and Organization. Almost all the members of THC participated in hosting sessions during this week. The sessions can be accessed here:

<https://trello.com/b/iw2p1W3l/co-creating-a-generative-future>

The Meshworking Cities and EcoRegions room continued with presentations from Marilyn Hamilton, Beth Sanders and connections from Living Cities Network.

As the World Unity Community of about 600 people connect and co-create the convergences, we are building a strong field of coherence. We are preparing to be able to work together in more concrete ways. We see ourselves as a ‘Social Body’ learning to walk to the future together. Julie Krull was inspiring in naming how we are all part of a super-organism of life. We will work with Julie in the coming year to put these concepts together to frame our development as a collective.

PROJECTS 2021

INNOVATION

CITY OF HOPE BAKERY

THC is a core, active team member of the City of Hope Project with [One Humanity Institute](#).

Anne-Marie Voorhoeve and Adrian Morab visited the site and facilitated intensive working sessions to align and document the vision, business plan and development pathway. Anne-Marie secured a major interest free loan from a philanthropist to purchase a second building. Anne-Marie connected the project with energetic grounding and Deep Earth Architecture practitioner Wendy Hastrich.

2 million people visit the Auschwitz Memorial sites each year. They often leave the grounds internally shattered. One Humanity Institute's City of Hope will offer them a space of reflection, healing and hope - inspired by a new vision for humanity that honours those who perished while inspiring rising generations to reach for an alternative future that resolves obstacles to global harmony.

A bakery in Oświęcim, gifted by a Jewish family, and an adjacent historical bakery will be turned into a safe and inclusive space for gatherings and exchange around a hot meal or freshly baked bread.

The Bakery-Cafe will include a Learning Center to equip youth as resilient learners with 21st century skills, a Start-up Hub, Co-working Space and Youth Think-tank to co-create a new story for humanity and the world. The Loving World Engineering Institute envisioned by David Geffen of Loving Classrooms Worldwide, will be a founding institution in this hub.

There will also be a Social Media Center, Peace library and Conference Rooms.

OHI (One Humanity institute) envisions the former military buildings to become a City of Hope - a transformative tourist experience that will inspire people to not only never let such an

atrocities happen again, but to find their place in actively building a brighter tomorrow.

PEACEDAY YOUTH ASSEMBLY

In 2020, THC formed an alliance with other organizations like MasterPeace, AIESEC and CityTransformers to organize a [Global Youth Assembly](#).

Young changemakers from almost 100 cities worldwide came together in a Global Youth Assembly on Peace Day 2020. They voiced their concerns, their hopes for the future, and their desire and commitment to work with global leaders to create a world that works for all within the limits of the planet.

In 2021, Young people from Australia to Mexico organized 120 local POP UP PEACE EVENTS, creating the unifying momentum, encouraging them to continue to be the changemakers in their communities.

On September 19th we organized regional online meetings in 4 time zones, where representatives of Pop-Ups could meet and exchange their actionable steps also with "Key Note Listeners" who gave their endorsements and a take away of the representatives' discussion. The result was a fun and open intergenerational dialogue that crossed borders, cultures, and networks.

On September 21st, 250 young people came together on Youth Island/Denmark. This was also an opportunity to celebrate peace while joining together in a call to action as part of an open dialogue with 3 representatives of the UN City in Copenhagen.

NMC - NIGHTMARECLINIC

The concept of nightmare clinics for young people with a refugee background - designed by Anita Floris - is an example of how, using SDi, the social cohesion of the Netherlands can be strengthened by supporting these young

people in their search for a natural place in their environment, making them stronger and more autonomous, and preparing them for their task in the future.

WHOLE SYSTEMS DESIGN: INQUIRIES IN THE KNOWING FIELD

Diana Claire continues writing and editing her book on Collective Constellations: [Whole Systems Design: Inquiries in the Knowing Field](#). This includes 2 chapters where THC is involved. Anne-Marie wrote the Foreword. (Published April, 2022)

Collective Constellations: Systemic Constellation Work is a philosophy of Life; a body of extraordinary teachings and knowledge including premises, principles, and themes; an experiential and embodied process; and a world-wide community of Participants, Constellators, Trainers, and Institutes. There are three branches of Systemic Constellation Work: Individual (within Family Systems), Organizational, and Collective Constellations. Dina Claire facilitates all branches with the THC team.

SPIRIT OF CANADA DIALOGUES PROJECT

Kara Stonehouse and Diana-Claire Douglas are core team members of this Canadian volunteer group that meets weekly to create monthly dialogues to practice 'listening beyond division'. In 2021 we hosted our first 5 monthly dialogues and created our website. www.spiritofcanada.org and started a formal newsletter list with a humble beginning of 100 people. We practice polarity processing on each topic we host and connect with the support of nature and the divine to help us hold this brave space.

METAAL KATHEDRAAL / ECOLOGICAL SOCIETY NETHERLANDS

Natascha van den Ban is a member of the Art Council Metaal Kathedraal and part of the core team of the [Ecological Society Netherlands](#). A movement launched in 2021, visible, experienceable and deeply rooted in and around Metaal Kathedraal (Metal Cathedral) in Utrecht, the Netherlands. The Metaal Kathedraal is a sanctuary, podium, meeting place and workplace for art, science and social design that develops in the midst of society. A leader and expert in imagining circular life. Initiated in 11 years from an artist collective who believe in a world in which everything and everyone can flourish.

With a deep belief in the creative and self-healing capacity, a regenerative society is built from this place in practice. Including a regenerative health and knowledge center based on the power, knowledge and skills of nature. A workplace of and for the youngest generations where various labs are being built together that function as work and learning places for all ages. Accessible with high-quality expertise to strengthen a regenerative movement. Ecological Society Netherlands is an actively connected network that is committed to achieving a regenerative, balanced future with each other and nature. All actions are nourishing for the earth and our own living environment.

Within a team of innovators, Natascha has contributed to the formulation of principles and working methods: from the heart, in connection with nature and the eco- and life systems we are part of. She also actively contributes to a cultural, educational and participatory program.

The co-creative and pragmatic character is valuable and retains its value. This vital, physical place makes the difference in giving hope and perspective – in the Netherlands and beyond. That is why The Hague Center is a proud partner. With great thanks to Anne-Marie Voorhoeve, this movement is also supported by the Club of Budapest.

UTRECHT WATER BIENNALE 2022

Natascha van den Ban is co-designer of the 1st [Water biënnale](#) of the province of Utrecht, the Netherlands in 2022. An initiative from Metaal Kathedraal (Metal Cathedral) in collaboration with Studio Makkink & Bey and Waterschool. Water biennale Utrecht is a biennial public event, stage and platform for change processes that works towards a long-term public program. The program offers a completely different picture of what water is, how we use it now and what water could be in a regenerative society. The Client Province of Utrecht will have the opportunity to present itself nationally as Ambassador of Water.

Within a team of experts, Anne-Marie Voorhoeve and Natascha van den Ban, under the guidance of the artist duo Bik van der Pol, contributed in 2020-2021 to the design of a working method that we call the 'water tables'. That solidly substantiates movement towards change in an emergent way.

After the development of the working method the Art Council Metaal Kathedraal (of which Natascha is a member) focused on creating the water tables. A carefully constructed setting of designers, artists, scientists, innovators, experts, residents, children, reporters and a moderator. With an interactive and performative form of coming together, open thinking and working together in 'waterranger expeditions'. With our developed 'water mirrors' as ways of research: Wonderwater – getting to know water again/ Be Water – knowledge development/ (Of) Who is Water – political dimension. The format will be expanded in 2022 into a complete program with an experienceable knowledge library and growing water archive to bring all the information found together. A water lab from community science and a training from the Water School. All from a high level of knowledge, in search of new truths, accompanied by the presence and wisdom of our youngest water watchmen in training.

PROJECTS 2021

EMERGENCE

ECOINTENTION - EUROPE
ENERGETICS PROJECT

THC is a partner in [Help2Heal Europe](#), a project of the Center for ECOintention. Several THC members are [ECOintention](#) practitioners, and Marianne de Jager and Natascha van den Ban are actively involved in the project.

Europe is a living entity, an organism with the Ural Mountains and the Volga River as the eastern border. The southern border goes through the Mediterranean. The islands of the Azores are the most western part, followed by Ireland, Scotland and Norway. The North Cape and the Kola peninsula form the northern border.

The organism Europe consists of thirty-three parts, called holons. The shape of a holon is determined by its geographical location and geological structures in the earth's crust. Each holon has, just like an organ, a special function.

Everything is connected in a living whole.

Quantum mechanics says that everything is energy. Good, flowing energy is the basis for positive development and growth. A system that is in good (energetic) condition has high diversity and complexity. All parts develop towards a higher level.

An energy scan made by the Center for ECOintention shows that most of the holons in Europe have (very) low energy. This has a negative effect on social processes, and all ecological and economic systems.

This was the reason to start Project Europe Energetics. The Project aims to contribute to the healing of Europe with ECOintention and other energetic methods in co-operation with local people.

ECOintention is a method to bring healthy energy and flow into ecosystems and

organizations. It combines modern science with ancient wisdom in a practical method. ECOintention is the application of Mind over Matter on a large scale.

Center for ECOintention has developed 9 large scale projects in natural areas with high transformation potential, where energetic balancing could have the most effect on local, national and international level and where healing is needed first to provide Europe as a whole with good energy. These projects - energetic healing systems - are located in: Western Europe: Wadden Sea (NL-D), Mols Bierge (DK), Hondsrug (NL). Eastern Europe: Bialowieza region (PL-RY), Oegra (RU), Dinepr Reservoir (UA) Central Europe: West Beskids (PL), Duna Ipoly (H), Bükk National Park (H).

We hope a healthy and vital organism Europe will have a positive effect on ecological, cultural, social and economic processes, and will contribute to the well-being of our most valuable ecosystem: Mother Earth.

(source: Center for ECOintention)

Marianne de Jager and Natascha van den Ban are doing energetic balancing for one of the national parks in Hungary (Bükk National Park).

DAY OF MINDFULNESS AND
COMPASSION

Anita Floris holds the space for ad Day of mindfulness and heartfulness on July 1st, also known as ketikoti ("the chain is cut" or "the chain is broken"). It is the day that, in 1863, slavery was abolished in Suriname and the Dutch Antilles. The fact that slavery is part of Dutch history is a sensitive subject. The conversation is often difficult and painful. By listening deeply to what is alive inside of us when confronted with the role of the perpetrator, rather than that of the victim or the rescuer, we can learn to mature our nervous

system. Thereby we can increase our capacity and ability to deal with difficult and painful issues, use our compassion and our heartfulness.

Mindfulness asks us to silently focus our attention on pain and suffering. To use our physical presence both in sitting and in our breathing to face, feel and experience everything that presents itself as thoughts and emotions around the theme of slavery. Although debate and conversation also have their value and their place in this theme, here we ask for quiet attention.

We have several guided exercises on the site, to choose from to find a quiet time on the 1st of July, to sit and pay attention and bear witness.

WHOLEWORLD-VIEW

Anne-Marie Voorhoeve is part of the core team of [Whole-World-View](#) and is actively involved in different DOIT teams of the projects developed.

THC team members have been playing different roles and where possible within THC we have prototyped different frameworks to support further development and possibility for outreach.

Kara Stonehouse has contributed graphic recordings of themes of the Whole World View to focus the energy and meditations during the seasonal convergences Peace Week and World Unity Week.

The WholeWorld-View Community was founded by Dr. Jude Currivan and Gil Agnew in 2017, and is a growing interdependent co-operative of global change agents in service to nurturing our personal and collective need for meaning and belonging, celebrating our innate diversity within a unified whole.

Its purpose is to empower the emergence of humanity's conscious evolution through the understanding, experiencing and embodying of unitive awareness.

Based on the book, The Cosmic Hologram, the WholeWorld-View message of unified reality provides a foundation and practical perspectives towards global problem solving upon which we can shift our individual and collective values and behaviors to be aligned, and in harmony, with the natural world, and universal and cosmic principles

The WholeWorld-View Community supports and aims to facilitate the transformation of the challenges of our global emergency into the emergence of our conscious evolution.

(source: WholeWorld-View)

WHOLE WORLD VIEW EDUCATION PROPOSAL AND MOVIE

THC is an avid supporter of embracing different lenses to see our world and cosmos and give meaning to it, in a way that we recognize unity in diversity. Anne-Mariene has been involved with Whole World View, and Loving Classrooms to design and launch an education proposal and a movie to advocate for a new collective worldview, that moves us from a perceived separation to a perspective of unity in diversity. It will approach education from the view of our fundamental interbeing; our interconnectedness, interdependence and belonging with our planetary home, Gaia, and the entire Universe.

This honors our rationality by acknowledging science, and it respectfully sees its limitation and the need for including universal love and the Ground of all Being, or Spirit. Without making space for all aspects of us, we will not be able to educate children in a balanced way, that can co-create a love-based, rather than a separation based future.

LOVING CLASSROOM

[Loving Classroom](#) is an educational programme that provides teachers and students with Positive Relationship Education, guiding teachers and students to cultivate a lifetime of good relationships and eventually also between natures and cultures - building a loving world, where we take care of each other's mental, emotional and physical wellbeing.

Anne-Marie is an ambassador in this project and helped design the launch in the House of Lords in the past, now we are hoping to be able to establish a Loving World Engineering Institute in Auschwitz

THC EGYPT

A community hub, The Together Temple has blossomed in Egypt where the Blue Lotus flower is being symbolically reintroduced to nourish a conscious social movement out of Africa. More than a social enterprise, the vision of this groups is to transform consciousness as we prototype new currencies and governance structures.

Drawing on a new world view and the principles of living systems, the motherfund moves beyond our current concepts of economics and social organization and offers a fresh way to share and regulate resources, interrelate, develop innovations, realize ourselves and co-ordinate our intelligence.

THC's Mona Rabie and Aansan Yeh are developing and prototyping a 'Mother Fund' that empowers conscious co-creators to realize wholesome wellbeing as well as their gifts and innovations for a thriving world.

THE HAGUE CENTER FOR FIELD INQUIRY

The Hague Center for Field Inquiry (THC.FI) decided on its name and logo.

THE HAGUE CENTER FOR FIELD INQUIRY

THC launched the THC.FI publicly with a Collective Constellation, “Collective Social Body Immune System.” Co-facilitated by Diana Claire and Anne-Marie.

Diana Claire was interviewed on “Constellating for the Collective” by the REAL Academy, a training institute for Systemic Constellation Work, founder Tanya Meyburgh. The interview is used in their training programs.

Diana Claire is meeting with researchers both Constellators and others, asking questions such as “What is research?” “What is the value of having a Center for Field Inquiry?” The results of these and other processes will inform us as to whether THC.FI becomes a holon of THC or is a brand of THC.

Diana Claire and Anne-Marie have been building partnerships for systemic constellation inquiry and research with Georg Muller-Christ and his PhD students of Bremen University Business School; Jude Currivan and the WholeWorld View; Irene Nooren and Holistic Blueprint Society.

Systemic Constellation Work Experiments continue in The Conscious Witness Project. Researchers Diana Claire, Judy Wilkins-Smith, Peter Stefanyi.

SONGS FOR PEACE

Sacred songs are a potent bridge from the cosmic to the manifest. Kara Stonehouse has been exploring how the spiritual accessing work she practices called ADIEWA can help people open to divine guidance and sing the sounds of healing from the ancestors of the past, present and future. In 2020 she

co-hosted an event with Chloe Goodchild to explore accessing messages from the spirit of our cities through song with the Whole World-View Community. Kara also lead the Songs for Peace project as an experiment. A small group met monthly for about a year, to tune into the spirit of a country and a symbol of peace from that country. We accessed the essence of what needed healing and then wrote songs from that energy. We practiced co-creating songs by adding tracks and words to each other's work. We created several powerful short song clips. We connected with the spirit of black power in the US just before the George Floyd police murder incident, the spirit of Brazil's ecological justice movement, and deep ancestors in Europe around the white dove symbol.

In 2021, the energy of this moved internally, while Kara focused on improving her musical theory knowledge and singing skills with one of the members. This was a barrier to publishing the songs and feeling comfortable sharing publicly, that needed development. Kara continues to connect with Danielela Castel, a sound weaver with a deep connection to nature, and Anne-Marie continues to connect with Chloe Goodchild, an internationally known sacred singing facilitator. Moving forward, Kara will join Kristen Hoffman in an artists for transformation synergy circle as part of the Evolutionary Leaders Circle. We have a sense that accessed singing is a powerful leadership tool for evolutionaries to be able to self-lead from the divine and transmit the quality and energy of the message to the masses.

This [google doc](#) is an example of how we reflected on the symbols, did an ADIEWA session with the energy and co-created songs.

Three songs are linked in the doc.

RE-UNITING CONTINENTS and GLOBAL CENTRE OF INDIGENOUS SCIENCES AND ANCESTRAL WISDOM

Anne-Marie Voorhoeve has been invited as space holder, deep listener and bridger of colonial and indigenous worldviews, to partner

with Chief Phil Lane Junior and Four Worlds Indigenous University. There is a beautiful prophecy that when the Condor, Eagle and Quetzal — three birds found in the Americas — reunite, a spiritually-based movement, led by Indigenous Peoples, will ultimately result in a great era of compassion, peace, justice and prosperity that will unite all members of the Human Family.

THC is recognized and honored as having the capacity to hold such significant spiritual and grounded work.

In 2021 we connected with elders in Mexico who performed constellations on this work, we performed systemic constellations virtually in Canada and the Netherlands and co-created a beautiful guided constellation ceremony called the Rainbow Bridge Constellation and Ceremony. The purpose is to initiate the re-unification of the 5 continents – Americas, Europe, Africa, Asia, Oceania with Rainbow Bridges, fulfilling prophecy and

THE SCIENTIFIC AND MEDICAL NETWORK CONFERENCE

Evolutionary Visions of the Future at The Scientific and Medical Network conference was held on 20th March 2021. Anne-Marie was one of the speakers. The work and mission of the Scientific and Medical Network and that of THC are aligned in our mutual desire to harmonize heart and head, subjective and objective.

The Scientific and Medical Network (SMN) is a worldwide professional community It promotes a greater acceptance of the human being's spiritual essence, as consistent with science. The network grew into a group of 950 members of scientists that support “open-minded, rigorous and evidence-based inquiry into themes bridging science, spirituality and consciousness”.

Part of this inquiry has been published in the Galileo report

GOVERNANCE AND ORGANIZATION THC

ROLE OF THE BOARD

The role of the board is to uphold our legal status as a charitable foundation in the Netherlands in line with the vision developed in THC Core.

The board consists of a chair, a treasurer and a secretary. The role of treasurer and secretary can be fulfilled by one person. The board members are appointed for an indefinite period. The directors receive no remuneration for their work.

The board of the THC consists of:

Chair: Anne-Marie Voorhoeve

Secretary: Marianne de Jager

Treasurer: Pieter Wackers
