

Strategic Connecting & CAPI

Establishing strategic connections, which serve the purpose of THC is an essential part of our work. An important aspect of that is CAPI: Coalescing Authority, Influence and Power (Adizez, Don Beck).

In the different strategic reasons for making connections there are two movements:

- From the inside out - what is needed for our own individual and collective consciousness growth to be available for our work, including participation in Communities of Practice;
- From the outside in - aimed at entering into strategic connections for existing and new policy developments in different sectors, between sectors and at different locations.

THC members often fulfill an initiating, leading, facilitating or actively participating role in different networks and organizations that work towards consciousness development.

THC is involved in a large number of projects, networks and networks of networks, including

- WholeWorld-View
- Evolutionary Leaders Circle
- World Unity Week
- Unity Earth
- SINE network
- Integral City
- Center for Human Emergence
- The Club of Budapest

- SIEUK works to promote an understanding of spirituality within schools and to create learning environments that better promote and nurture the inner life of students and teachers.

As a result, THC can be a connecting link between these different initiatives, and help them to reinforce, complement and learn from each other, so that what they do is aligned with a shared and overarching goal.

SDI Leadership & Meshworking

THC's expertise lies, among other things, in the field of Spiral Dynamics integral, and in bringing organizations and people together and motivating them to work for a higher purpose. A unique expertise of THC lies in the design and facilitation of multi-stakeholder projects. The term we use for this is Meshworking, introduced by Dr. Don Beck.

Meshworking is both a vision and a method. In essence, Meshworking is about the way in which we bring a variety of stakeholders together behind a common, higher goal, so that real progress can be made in solving complex issues.

Unlike in a network where the connections between the partners are focused on their own interests, each partner's own interests are placed within the context of the common interest. THC fulfills the role of 'whole holder' - the person who gives the example of how cooperation can be based on social intentions. THCs often fulfill this role on a (partly) voluntary basis. This also ensures a large degree of independence.
